<b>Name: Sokoi 2 Harness</b>	<b>Code: 55312</b>	<b>Sokoi Harnesses</b>
------------------------------	--------------------	------------------------

### Description

The harness is made in polyester and it features:

- 1 dorsal "D" attachment for the fall arrest system. 2 frontal textile rings.
- Adjustable chest belt and leg loops.
- Adjustable top and bottom; featuring dorsal and frontal attachment.
- Wider comfortable straps for extended time use.

Sokoi harnesses are in polyester, which has lower elongation properties than other materials. The harness does not stretch dangerously when subject to a fall, therefore, the worker does not risk slipping out of the harness.

Sokoi harnesses may be equipped, upon request, with a Tell-Tale fall indicator, positioned, through the seams, on the back of the shoulder; it detaches itself in the event of a fall. The harness must be immediately replaced after a fall.

### Technical Specifications:

- Dorsal "D" Attachment for the fall arrest system.
- "A" or "A/2" label: shows the attachment points of the fall arrest system.
- Labels: all the harnesses labels and markings are in an inner strong polyethylene wrapping to prevent the marking from fading.
- Sliders: the ends of the shoulders straps are locked by plastic lips.
- All the textile loops are covered with a fabric reinforcement.

The product is designed and manufactured to comply with the essential health and safety requirements of Directive 89/686/EEC, and to conform to the requirements of EN 361.  
It is classified as PPE Cat. III.
